FOR IMMEDIATE RELEASE

BOSON RELEASES EXSIM-MAX PRACTICE EXAMS FOR CISCO® AND MICROSOFT®

Nashville, Tenn. October 28, 2009 – Boson Software, LLC, the leading provider of top-quality learning solutions for IT professionals seeking certification, announced today the release of two new ExSim-Max™ practice exams for the Cisco CCNA® Voice and Microsoft Server Administrator certifications.

ExSim-Max practice exams are written and developed by Boson's team of subject-matter experts and include comprehensive explanations and detailed references. ExSim-Max simulates the level of difficulty, question types and item distribution, preparing candidates for the exam experience. ExSim-Max is developed to ensure that the certification candidates know they are ready to pass.

ExSim-Max for Cisco 640-460, CCNA Voice, provides an accurate and complete representation of what you will see on the actual Cisco exam. In addition, "ExSim-Max for Cisco 640-460 has a new interactive item type that simulates certain subsets of the Cisco Configuration Assistant that relate to configuring the UC520 Smart Business Communications System (SBCS)," says John Oden, Director of Development for Boson.

"We are also proud to add the new ExSim-Max for Microsoft 70-646 to our product line," added Oden. ExSim-Max for Microsoft 70-646 completes the full line of ExSim-Max practice exams for the Microsoft Certified IT Professional (MCITP) Server Administrator credential.

The Boson ExSim-Max practice exams, NetSim™ network simulators and Kits are available online at www.boson.com, or you can call 877-333-EXAM (3926) for more information.

Boson Software, LLC is a privately held company with offices in Tampa, Fla. and Nashville, Tenn. Boson specializes in providing robust learning solutions, including the NetSim Cisco network simulator and the ExSim-Max examination preparation materials used by individuals, businesses, academic institutions and government entities around the world. Through its affiliate Boson Training, LLC, Boson offers instructor-led training for Cisco technologies, as well as for security technologies including EC Council's Certified Ethical Hacker™ program.
