FOR IMMEDIATE RELEASE

BOSON RELEASES PRODUCTS FOR THE NEW CCNA AND CCENT TRACKS

Nashville, Tenn. November 29, 2007 - Boson Software, LLC, a provider of premier learning solutions for IT professionals seeking certification, announced the release of five new products for the new CCENT[®] and CCNA[®] certification tracks. This product grouping includes Boson NetSim[™] for CCNA 7.0, NetSim for CCENT 7.0, ExSim-Max[™] for Cisco 640-802, ExSim-Max for Cisco 640-816 and ExSim-Max for Cisco 640-822.

CCENT (Cisco Certified Entry Networking Technician) is the newest Cisco certification that validates the skills required for entry-level network support positions. Candidates for CCENT should have the knowledge and skill to install, operate and troubleshoot a small enterprise branch network. In addition, CCENT certification is the first step toward achieving the CCNA credential.

The CCNA (Cisco Certified Network Associate) certification validates the ability to install, configure, operate and troubleshoot medium-size enterprise branch networks with more complex connections. According to Cisco, the new CCNA curriculum includes basic mitigation of security threats, introduction to wireless networking concepts and terminology, and performance-based skills.

Boson NetSim is a software-based network simulator that allows the user to design and accurately test a Cisco network. NetSim's Virtual Packet Technology makes this software superior to others because it actually simulates the functions of the Cisco Internetwork Operating System (IOS[®]). Boson ExSim-Max is the toughest exam simulation on the market. NetSim and ExSim-Max used in conjunction will not only help users strengthen their knowledge and skill set but also ensures that they will pass the exam.

“We are thrilled to be the only provider to offer a complete training solution for the new CCENT and CCNA certification tracks,” said Kelly Mansfield, Director of Marketing for Boson. “The new NetSim labs will help you build the networking skills required for your certification. Then you can test your knowledge with ExSim-Max to feel confident you are ready for your exam,” added Mansfield.

Boson NetSim for CCNA 7.0, NetSim for CCENT 7.0, ExSim-Max for Cisco 640-802, ExSim-Max for Cisco 640-816 and ExSim-Max for Cisco 640-822 are available online at www.boson.com or you can call 877-333-EXAM (3926) for more information.

Boson Software, LLC is a privately held company with offices in Tampa, Fla. and Nashville, Tenn. Boson specializes in providing robust learning solutions, including the NetSim Cisco network simulator and the ExSim-Max examination preparation materials used by individuals, businesses, academic institutions and government entities around the world. Through its affiliate Boson Training, LLC, Boson offers instructor-led training for Cisco technologies, as well as for security technologies including EC Council's Certified Ethical Hacker™ program
