FOR IMMEDIATE RELEASE

BOSON RELEASES NETSIM FOR CCNA VERSION 7.0 PREVIEW

Nashville, Tenn, July 20, 2007 - Boson Software, LLC, a provider of premier learning solutions for IT professionals seeking certification, announced today the release of Boson NetSim® for CCNA 7.0 Preview. Boson NetSim is a software-based network simulator that allows the user to design and accurately test a Cisco® network.

Boson NetSim's Virtual Packet Technology makes this software superior to others because it actually simulates the functions of the Cisco Internetwork Operating System (IOS®). This technology creates individual packets that are routed and switched through the simulated network, allowing the Boson NetSim to build an appropriate virtual routing table, and simulate true networking.

NetSim for CCNA 7.0 Preview includes new technologies for the Cisco 640-802 exam based on current information released by Cisco. This product is supported on computers running the Windows Vista operating system. NetSim for CCNA 7.0 Preview also supports Internet Protocol Version 6 (IPv6) Routing.

"Purchasing NetSim for CCNA 7.0 Preview will also entitle the user to product updates included in the Preview version and a free upgrade to the final version when it is released," said Chad Altman, Senior Software Engineer. "The final version of NetSim for CCNA 7.0 will include additional labs covering the technologies and concepts required for the following new Cisco CCNA exams: 640-802 CCNA, 640-822 ICND1 and 640-816 ICND2," Altman added.

The Boson NetSim for CCNA 7.0 Preview is available online at www.boson.com or you can call 877-333-EXAM (3926) for more information.

Boson Software, LLC is a privately-held company with offices in Tampa, Florida, and Nashville, Tennessee. Boson specializes in providing robust learning solutions, including the NetSim Cisco network simulator and the ExSim examination preparation materials used by individuals, businesses, academic institutions, and government entities around the world. Through its affiliate Boson Training, LLC, Boson offers instructor-led training for Cisco technologies, as well as for security technologies including EC Council's Certified Ethical Hacker™ program.
