FOR IMMEDIATE RELEASE

BOSON RELEASES EXSIM-MAX FOR CISCO 642-825

Nashville, Tenn. October 8, 2008 – Boson Software, LLC, a provider of premier learning solutions for IT professionals seeking certification, announced today the release of ExSim-Max™ for Cisco® 642-825. This new exam simulation product covers the Cisco 642-825 Implementing Secure Converged Wide Area Networks (ISCW) exam.

The ISCW 642-825 is a qualifying exam for the Cisco Certified Network Professional (CCNP®). This exam certifies that successful candidates have important knowledge and skills necessary to secure and expand the reach of an enterprise network to teleworkers and remote sites with focus on securing remote access and VPN client configuration.

ExSim-Max simulates the level of difficulty, question types and item distribution preparing candidates for the exam experience. “The Boson ExSim-Max exam simulation for Cisco 642-825 (ISCW) is the first to offer a simulation of Cisco’s Router and Security Device Manager (SDM). The interactive simulation items featuring SDM will help you assess your current skill level, and in addition, will help you learn the concepts covered on the Cisco 642-825 exam,” said John Oden, Director of Development for Boson.

“Our product development team has worked hard to deliver the best Cisco interactive simulation items available in the marketplace. We have used our NetSim network simulation technology to deliver Cisco IOS command-line simulations in our practice exams for some time now. We have now extended our NetSim technology to include Cisco Router and Security Device Manager (SDM) simulations as well,” added Oden.

The Boson ExSim-Max practice exams, NetSim™ network simulators and Kits are available online at www.boson.com, or you can call 877-333-EXAM (3926) for more information.

Boson Software, LLC is a privately held company with offices in Tampa, Fla. and Nashville, Tenn. Boson specializes in providing robust learning solutions, including the NetSim Cisco network simulator and the ExSim-Max examination preparation materials used by individuals, businesses, academic institutions and government entities around the world. Through its affiliate Boson Training, LLC, Boson offers instructor-led training for Cisco technologies, as well as for security technologies including EC Council's Certified Ethical Hacker™ program.
